## LCE Wildlife Feeders

Several Sizes Available  
Std. Sizes - 110lbs, 250lbs, and 500lbs shelled corn capacity.

An LCE feeder is no hassle to the deer or you. Constructed of HDPE Plastic, the feeder is not only easy to set up and fill, but also incredibly durable. Our proven, field tested design is completely gravity fed, with no

electronic or moving parts. Feed is held in a watertight chamber until it flows through four outlets into the circular trough, making it possible to feed multiple deer at once. The trough is elevated and protected by a rain guard to keep feed from being wasted or spoiled.

In addition to providing a reliable food source for wildlife, the unique design allows it to be fitted with bungee chords to act as an antler trap.

**Custom Built:** Wildlife Feeders  
Hunting Blinds  
Fish Habitats  
Ice Fishing Shelters
